

Long day brown “dorata di Parma” type hybrid onion variety with excellent post-harvest storability. Bulbs with yellow- brown coloured skin, spherical shape and highly uniform size. Bulbs have an average weight of 150-200 g. Plants are strong with good vigour, a medium-short cycle to be harvested mid-end July at 43-47° latitude. Suitable for fresh market and processing.

ADDITIONAL INFORMATION

Botanical Name	Allium cepa L.
Variety	Dorica F.1
Typology	Round
Colour	Yellow bronze
Pezzatura	Medium-big (150 gr)
Fotoperiodo	Long days
Periodo di Utilizzazione	Spring plantings
Cycle (days from transplanted)	Medium-short
Stoccaggio	Eccellent
Destination	fresh market, processing
